

VISION AND STRATEGY

VISION

INGECID, Investigación y Desarrollo de Proyectos, S.L., has become a technological partner of its clients, with the main vision of being a reference with impacting international patents in construction processes in the area of civil engineering applied to sectors such as renewable energies and nuclear energy.

STRATEGY

The strategy of INGENICID, Investigación y Desarrollo de Proyectos, S.L consists of identifying new problems in the area of civil engineering and software design and finding novel solutions by means of R+D+i projects, through experimental research and industrial development, that give our clients a competitive advantage. As a company, INGENICID, has vast experience in the development of R+D+i projects and has engineers specialised in the technologies associated with the project, as well as the infrastructure required to develop our own novel solutions with strategic collaborators.
